Research in curriculum and instruction in Africa, the Caribbean, and the Middle East has been changing rapidly over the past 25 years. Scholars, practitioners, and students find it difficult to keep abreast of relevant knowledge. Available journals and textbooks generally report international perspectives, making the search for valid materials on specific countries within these regions complex and difficult.

Research on Education in Africa, the Caribbean, and the Middle East will provide a comprehensive view of current and emerging educational knowledge, research strategies, and policy in these regions. Currently unavailable, or difficult to gather, materials from a variety of viewpoints and sources would be presented in a usable and organized format.

Each series volume would present a juried, scholarly, and accessible review of educational research, theory, and/or policy, pre-K-16, in these regions. Topics covered in each volume would be determined by present issues and trends, as well as generative themes related to current research and theory. Published volumes will include empirical studies, policy analysis, literature reviews, and positing of theoretical and conceptual bases.

Call for Chapter Proposals

You are invited to contribute a chapter to Book VIII of the Series Research in Education in Africa, Caribbean, and the Middle East to be published by Information Age Publishing in the Summer/Fall 2017. This proposed book will be tentatively titled Transforming Public Education in Africa, the Caribbean, and the Middle East.

Details here

Books in this series:

- Transforming Public Education in Africa, the Caribbean, and the Middle East
- Research on the Influences of Educational Policy on Teaching and Learning
- Advances in Special Education Research and Praxis in Selected Countries of Africa, Caribbean and the Middle East
- Research on Education in Africa, the Caribbean, and the Middle East
- Undertaking Educational Challenges in the 21st Century
- The Enterprise of Education
- Crosscurrents and Crosscutting Themes
- Forefronts in Research

$36.50 per book + FREE SHIPPING when you order the complete series.
Public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions are moving into a phase of public education in which a variety of factors are being identified as influencing the quality of public education and its ability to serve all children and adolescents. It has become evident that ethnic background, gender, religious affiliation, and ability/disability are important factors in who is served and how well the individual is served. The chapters in this volume, Book 8, of Research on Education in Africa, the Caribbean, and the Middle East document and describe the status, success, and limitations of public education’s efforts at transformation. They provide points from which further research and practice might occur.

CONTENTS:
This edited volume explores various issues pertaining to the education of children with disabilities in Africa, the Caribbean and Middle East. As a group, persons with disabilities have been subjected to social, cultural and educational exclusions of various forms and for various socially-scripted reasons. In education, for instance, individuals with disabilities have been altogether excluded from educational participation in many parts of the developing world or they have been excluded from pursuing meaningfully beneficial higher levels of education in developed countries like the United States. One of the social responses/remedies to the widely-acknowledged exclusionary practices experienced by learners with disabilities has been the widespread implementation of inclusive practices in the education of individuals with disabilities across countries, in the west and the developing regions of the world. A distinctive marker of difference in the way inclusive practices have been enacted in western countries versus those in the developing world has primarily stemmed from the fact that majority of western countries operate under funded mandates that also regulate the provision of education to persons with disabilities. While the ideal of inclusion has been highly desirable, many of countries in the developing world have floundered in their implementation due to lack sound legislative framework to guide implementation coupled with socio-cultural factors related to negative perceptions of disabilities and limited funding sources. Chapters in this volume explore inclusive education from a variety of perspectives.
